PowerNet Of Dayton

It Takes Teamwork To Make A Dream Work

What Is PowerNet?

PowerNet of Dayton is a grassroots, based, not-for-profit organization founded in June of 2002 to empower poor inner-city communities to define and enhance their quality of life. After spending our first 12 months doing community organizing, social service and grassroots (door-to-door) research, coalition building, conducting focus groups and think tanks, and building relationships with community and faith based groups from different religious traditions, PowerNet came to the very clear and definitive conclusion that a comprehensive, faith based, family centered ex-offender reentry initiative was the best possible strategy for addressing the greatest challenges, i.e., crime and poverty, which limit the quality of life within inner-city communities

-Offering our clients the opportunities for positive change-

How Will We Accomplish Our Mission?

PowerNet brings together volunteers to do research, community organizing, community education and advocacy, coalition building, strategic planning, program development and evaluation, and resource gathering. PowerNet facilitates the process of prioritizing the issues of greatest concern to the individuals who live, work or own businesses in the targeted community. We subsequently engage these citizens in the planning and implementation of the most appropriate goals, objectives, strategies, and actions to address the issues identified (e.g. crime, unemployment, economic deprivation, poor housing, lack of youth opportunities, poor health, poor self-esteem, hopelessness)

-Improving economy viability & enhancing over all quality of life in urban communities-

Thank You for considering PowerNet Of Dayton for your employment needs.

For help with any questions you might have please contact a job developer at your convenience.
